

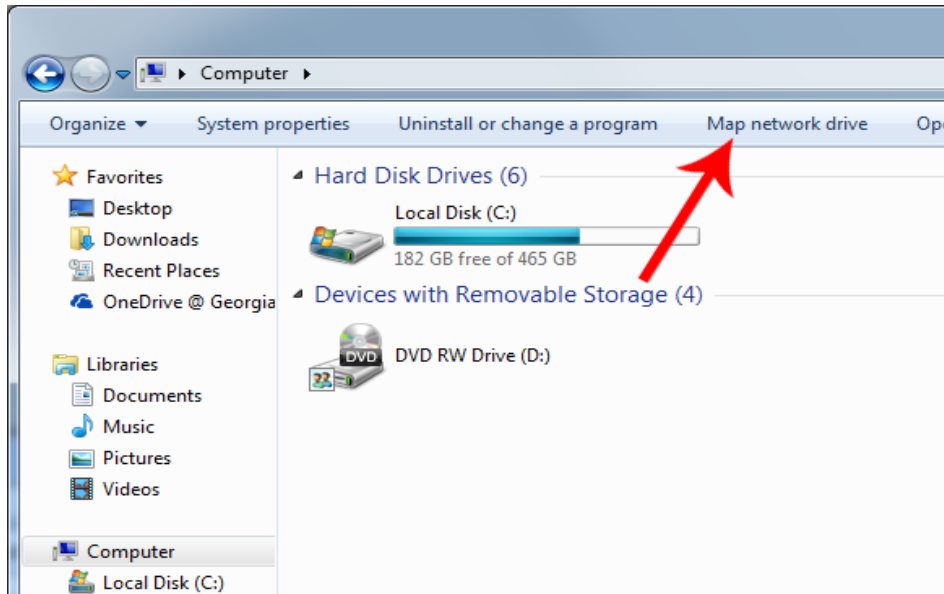

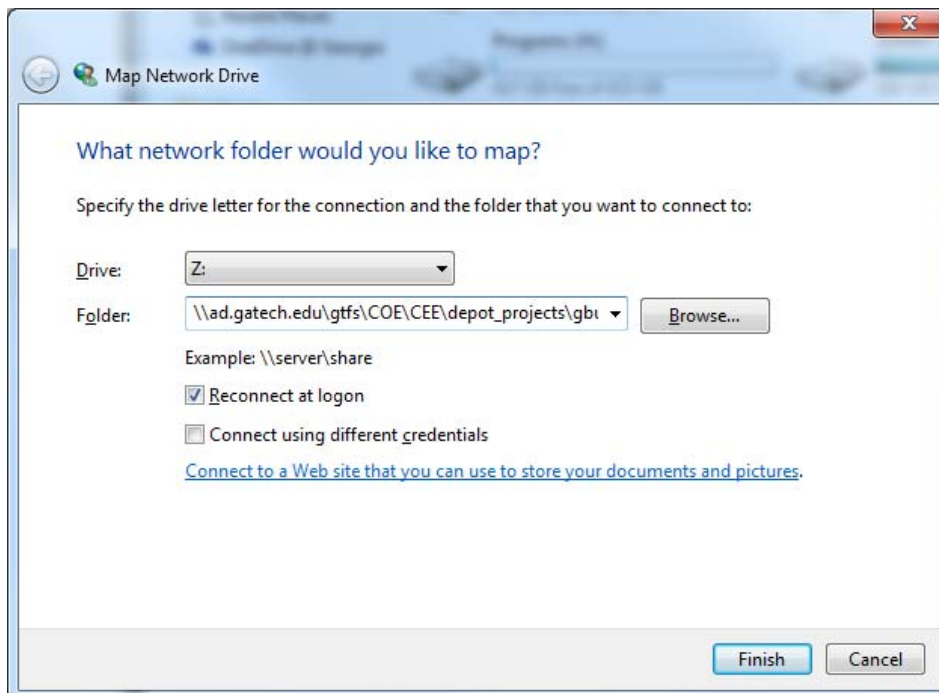

Mapping to Projects Folders

Windows

- From Windows Explorer click on Computer.
- From the menu ribbon click on Map network drive.

- In the dialog box that appears select a Drive letter from the dropdown list.
- Enter the name of your projects folder in the box for Folder and click Finish.
(\\ad.gatech.edu\gtfs\COE\CEE\depot_projects\[Share_Name])

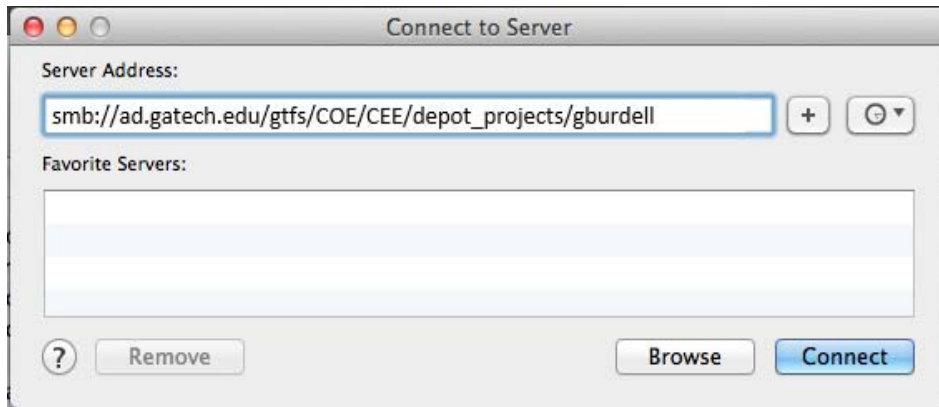

- For example George Burdell would have a projects folder of:
\\ad.gatech.edu\gtfs\COE\CEE\depot_projects\gburdell

Mapping to Projects Folders

Mac

- From Finder click the menu item Go and then select Connect to Server.
- In the dialog box that appears for Server Address enter the name of your projects folder and click Connect.

(smb://ad.gatech.edu/gtfs/COE/CEE/depot_projects/[Share_Name])

- For example George Burdell would have a projects folder of:
smb://ad.gatech.edu/gtfs/COE/CEE/depot_projects/gburdell
